

Patent Number	Patent Title							
9,938,127	Beverage system ice maker and ice and water reservoir							
9,897,364	High efficiency refrigerator							
9,890,989	Active insulation hybrid dual evaporator with rotating fan							
9,863,674	Fin-coil design for dual suction air conditioning unit							
9,835,369	Vacuum insulated structure tubular cabinet construction							
9,821,420	Method of forming a refrigeration heat exchanger							
9,810,472	Synchronous temperature rate control for refrigeration with reduced energy consumption							
9,803,898	Air conditioner with selectable supplemental compressor cooling							
9,791,203	Secondary fluid infrastructure within a refrigerator and method thereof							
9,759,438	Air conditioner with selective filtering for air purification							
9,731,234	Liquid pitcher including divided fluid filter for inlet and outlet filtering							
9,714,785	Higher efficiency appliance employing thermal load shifting in refrigerators having horizontal mullion							
9,714,779	Air conditioner with selective filtering for air purification							
9,696,077	Dual capillary tube / heat exchanger in combination with cycle priming for reducing charge migration							
9,656,880	Drinking water filter with integral self-disinfecting delivery system							
9,635,995	Dishwasher support structures							
9,635,972	Apparatus, method and kit for retrofitting an indoor water dispenser of an existing refrigerator							
9,625,203	Moisture control system for an appliance and method for controlling moisture within an appliance							
9,599,353	Split air conditioning system with a single outdoor unit							
9,568,219	High efficiency refrigerator							
9,541,236	Multi-stage home refueling appliance and method for supplying compressed natural gas							
9,534,831	Liquid dispenser with collapsible container							
9,534,824	Ice cube release and rapid freeze using fluid exchange apparatus and methods							
9,528,736	Ice delivery method for modular cooling system							
9,518,771	Twistable tray for heater less ice maker							
9,476,636	Bladder pump for liquid dispensing							
9,417,001	Top cooling module for a refrigerator							
9,357,899	Dishwasher support structures							
9,327,216	Customizable multi-stage water treatment system							

9,320,993	Filter housing for small media					
9,314,716	Customizable multi-stage water treatment assembly					
9,272,892	Enhanced heat transfer to water					
9,252,570	Countertop module utilities enabled via connection					
9,250,007	Hydrophilic structures for condensation management in appliances					
9,188,369	Fin-coil design for a dual suction air conditioning unit					
9,150,400	Beverage system icemaker and ice and water reservoir					
9,149,745	Drinking water filter with integral self-disinfecting delivery system					
9,140,480	Active insulation hybrid dual evaporator with rotating fan					
9,140,479	Synchronous temperature rate control and apparatus for refrigeration with reduced energy consumption					
9,140,478	Synchronous temperature rate control for refrigeration with reduced energy consumption					
9,103,578	Substance communicating device for coupling to a host					
9,103,569	Higher efficiency appliance employing thermal load shifting in refrigerators having vertical mullion					
9,071,907	Vacuum insulated structure tubular cabinet construction					
9,052,133	Moisture control system for an appliance and method for controlling moisture within an appliance					
8,944,541	Vacuum panel cabinet structure for a refrigerator					
8,926,032	Hydrophilic structure for condensation management on the movable mullion of a refrigerator					
8,925,335	Ice cube release and rapid freeze using fluid exchange apparatus and methods					
8,919,356	Ozone generation module					
8,864,251	Hydrophilic structures for condensation management in refrigerator appliances					
8,830,660	Mechanical power service communicating device and system					
8,794,026	Secondary cooling apparatus and method for a refrigerator					
8,794,019	Variable position air damper for a refrigerator					
8,739,568	Appliance feature module enabled by energy or materials sourced from the host appliance					
8,726,690	Insulation panels applied to or as a feature module					
8,720,222	Higher efficiency appliance employing thermal load shifting in refrigerators having horizontal mullion					
8,528,610	Mechanically energized substance communication coupling system					
8,517,337	Proximity sensor enabled substance communication coupling system					
8,511,109	High efficiency refrigerator					
8,456,040	Refrigerator module utilities enabled via connection					

8,439,178	Proximity sensor enabled mechanical power coupling system				
8,430,221	Mechanically energized mechanical power coupling system				
8,387,948	Mechanically energized substance communication coupling system				
8,359,969	Apparatus, method and kit for retrofitting an indoor water dispenser of an existing refrigerator				
8,336,975	Plenum on front of refrigerator/freezer door				
8,336,322	Distributed refrigeration system with optional storage module and controller				
8,336,321	Hybrid multi-evaporator central cooling system for modular kitchen				
8,299,656	Feature module connection system				
8,281,608	Tubular conduit				
8,245,524	Thermal cascade system for distributed household refrigeration system				
8,161,760	Utilities grid for distributed refrigeration system				
8,083,985	Method for producing appliance cabinets and appliance cabinet Produced by such method				
8,061,153	Refrigeration appliance with optional storage module				
8,042,355	Temporary refrigerator storage modules				
8,008,586	Mechanically energized mechanical power communication coupling system				
7,980,093	Combined refrigerant compressor and secondary liquid coolant pump				
7,926,298	Variable position air damper for a refrigerator				
7,908,883	Refrigerator accelerated heat exchanger				
7,908,873	Minimized insulation thickness between high and low sides of cooling module set utilizing gas filled insulation panels				
7,437,886	Refrigerator ice storage bin with lid				
7,210,307	Refrigerator ice storage bin with lid				
6,973,799	Distributed refrigeration system for a vehicle				
6,918,257	Thermal conditioning beverage container holder				
6,813,896	Power bus for removable refrigerator shelves				
6,725,680	Multi-compartment refrigerator control algorithm for variable speed evaporator fan motor				
6,694,754	Refrigeration appliance with pulsed defrost heater				
6,640,551	Thermal conditioning beverage container holder				
6,532,751	Method of maximizing ice production in a refrigeration appliance				
5,899,083	Multi-compartment refrigeration system				
5,758,512	Multi-compartment refrigeration system				

5,636,453	Plastic bearing dryer idler					
5,465,591	Dual evaporator refrigerator with non-simultaneous evaporator					
5,419,148	Electronic control mounting system for a refrigerator					
5,377,498	Multi-temperature evaporator refrigeration system with variable speed compressor					
5,375,428	Control algorithm for dual temperature evaporator system					
5,272,884	Method for sequentially operating refrigeration system with multiple evaporators					
5,261,247	Fuzzy logic apparatus control					
5,251,455	Energy efficient insulation system for refrigerator/freezer					
5,231,847	Multi-temperature evaporator refrigerator system with variable speed compressor					
5,009,081	Modular mechanical refrigeration unit					
5,007,246	Modular mechanical refrigeration unit					
4,907,419	Modular mechanical refrigeration unit
